

Soniox TTS Voice Roster

Soniox - api.soniox.com

Total voices (current, tts-rt-v2): 70
- **Male:** 40
- **Female:** 30
Total languages per voice: 63 (every voice speaks all of them)
Legacy model (tts-rt-v1): 28 voices (14 male / 14 female)
Custom cloned voice (this project): "Praneeth" (95658b7d-ecb0-4372-a499-3e8d445c38a0)
Generated: 2026-08-18, from a live GET /v1/tts-models call

Unlike Svara, Soniox voices aren't tied to one native language -- every voice can speak all 63 supported languages (Hindi, Tamil, Telugu, Bengali, Marathi, Gujarati, Kannada, Malayalam, Punjabi, Urdu and dozens more included). Some voices carry an accent flavor baked into their description text (British, Australian, Indian, Spanish, etc.); this is noted per-voice below where present. This document lists all voices grouped by gender for the current model (tts-rt-v2, Section 1) and the older model still exposed by the API (tts-rt-v1, Section 2).

Note: tts-rt-v2 vs. tts-rt-v1

This project's .env sets SONIOX_TTS_MODEL=tts-rt-v2, so the voices this bot can actually use are the 70 in Section 1. The older tts-rt-v1 (28 voices) is still returned by the API for backward compatibility. Of its voices, 7 were retired in v2 (Claire, Elise, Jack, Maya, Meera, Noah, Sofia), while 49 are new additions in v2 not present in v1.

Section 1 - Current model (tts-rt-v2): Male / Female breakdown

Male: 40 Female: 30 Total: 70

Male voices (40)

Section 3 - Custom cloned voice (this project)

This project also owns one cloned voice on Soniox, created via `scripts/soniox_clone_voice.py` from a WhatsApp voice-note reference clip:

Name: Praneeth

ID: 95658b7d-ecb0-4372-a499-3e8d445c38a0

Models: tts-rt-v2 (ready), tts-rt-v1 (ready)

It is currently set as `SONIOX_TTS_VOICE` in `.env`, so the bot speaks with this cloned voice rather than one of the 70 built-in `tts-rt-v2` voices listed in Section 1.
