*Every Svara voice can speak all 80 supported languages; its native language (listed here) is where its accent lives. This document lists all 320 voices grouped by native language, with a dedicated breakdown of Indian-language voices by gender in Section 1.*

## Note: why 25 Indian languages, not 19

Kenpath's svara-tts-v1 open-weights model card (Hugging Face) describes the original release as covering 18 Indic languages + Indian English (19 total). This roster was pulled live from the hosted API ([api.kenpathlabs.com](https://api.kenpathlabs.com)), which has grown past that: all 18 original Indic languages are still here, "Indian English" now shows up as an accent tag on English voices rather than a separate language code (see the 10-voice callout in Section 1), and 7 more Indian languages have been added since:

**Kashmiri, Konkani, Manipuri (Meitei), Odia, Rajasthani, Sindhi, Urdu**

Rows shaded pale yellow / marked 'new' are the 7 Indian languages added since the original svara-tts-v1 model card's 19-language description (see the note on the title page).

Bonus: 10 English voices carry an 'Indian' accent tag (5 male, 5 female) - this is how 'Indian English' (the 19th language in the original model card) shows up in the current API. Listed separately at the end of this section, since English itself isn't a native-Indian-language code in Svara's roster.
